

MODULE ANSWER

Scenarios of Maturity Checklist

Activity

Level: Basic

Duration: 

Instructions

Updates to a Data Card can look like both upstream and downstream additions, removals, or revisions. Use this checklist to think through and plan for a variety of scenarios which can prompt you to revisit your Data Card.

Scenario Maturity Checklist

Develop a strategy to update your Data Card for each of the following scenarios:

- A new feature or label is added to your dataset
- Datapoints or features from your dataset need to be removed
- A new analysis reveals a skew in your dataset
- Surprising results are reported when:
 - Your dataset is joined with another dataset
 - Your dataset is used in a new domain
- A new version of your dataset is made available to the public
- Changes to an upstream source that can significantly alter the contents of your dataset
- Changes to the access, wipeout, or retention policies of your dataset
